

## About the Department

The Department of Electronics was established by the University of Cochin in 1975. The Department is a postgraduate department offering master's and doctoral degree programs in cutting-edge electronics areas, supported by DST-FIST and UGC-SAP. It has well equipped research laboratories that utilize state-of-the-art technology for carrying out cutting-edge research work.

## About the Workshop

The Department of Telecommunications' (DoT) Advanced 5G Labs Initiative is a groundbreaking effort aimed at propelling India to the forefront of 5G technology development and deployment. By creating an ecosystem of innovation, collaboration, and skills development, the initiative paves the way for India to play a leading role in shaping the future of telecommunications. This workshop presents a deep dive into the initiatives spearheaded by the Department of Telecommunications (DoT) and an exploration of the evolution of mobile communications, the latest technologies driving this evolution and examine real-world use cases that showcase the transformative impact of mobile communication across diverse industries.

This workshop is organised by DOE under the RUSA 2.0 major project T4C.

### Resource Person:

**Shri S Gopalan,**  
DDG (Compliance)  
Dept. of Telecommunications,  
Ernakulam
